# celigo

Hundreds of applications. Thousands of business processes. Millions of combinations.

ONE iPaaS.

Celigo is the integration platform that brings it all together.

**Integrate any
business application**
to any other business application

**Automate and optimize
business processes**
end to end

**Accelerate digital
transformation**
across the entire organization

Business processes need to be integrated.

Celigo enables IT and non-IT teams to quickly **automate every business process** across the entire organization in the most optimal way.

Build integrations with the best-in-class business process automation workspace

Build custom integrations, mappings, and business logic to automate any unique business processes through a powerful and intuitive user interface.

Optimize processes using prebuilt integration applications with embedded business logic

Only Celigo delivers managed prebuilt integration applications that include embedded business logic to automate up to 100% of a business process.
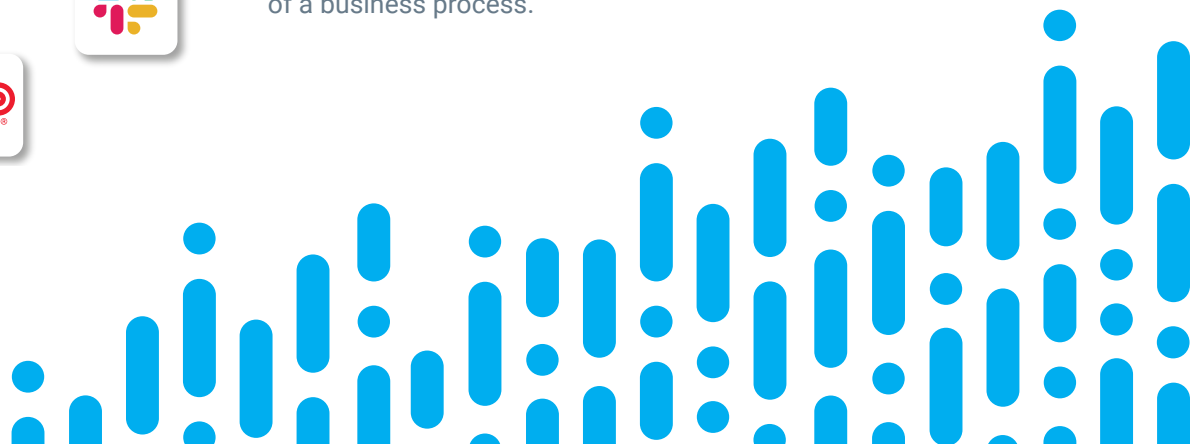

Empower every team using one unified platform with infinite scalability

Enterprise iPaaS
with no limitations of number of integrations or data volume

Business self-service with IT governance
that is powerful and accessible with role-based control

Lowest total cost of ownership
that increases in value as you scale up

Automate every use case across the organization

"Celigo was instrumental in helping us fully automate our Quote to Cash process. Automating our transactions from Salesforce prevented us from having to hire an additional five full-time employees. Reducing the need for paper processing has even allowed us to seamlessly transition to a work-from-home policy."

Dave Witty
Director of Financial Systems

"The automation of our staffing processes took away manual work and dramatically changed our labor models. Not only did we save a ton of effort, but we got data integrity, and we no longer have all the errors which affect people's payroll and pay rates."

Eric Flippo
Director of IT
