Complete Integration Platform for Microsoft Dynamics 365 Partners and Customers

Build Integrations Quickly and Efficiently

The right data in the right place at the right time with integrator.io

Eliminate manual data entry, data exports, costly errors, delays, and processes managed with spreadsheets and email. Celigo's platform enables visibility across the organization—with fewer technical resources.

Intuitive
Reduces learning curves and allows for easier allocation of resources

Flexible
Complete control with no code or advanced custom code options

Reliable
Prevent data loss when endpoints are offline

Scalable
Supports hundreds, thousands, or millions of orders a day

Compliant
SOC 2 Type 2, GDPR and more

Celigo iPaaS

Scalable Infrastructure
- Infinite Scalability
- High Availability
- Zero Volume Limits
- Zero Scheduled Downtime

Automation Marketplace
- Managed Business Process Automations
- Third-Party Managed Business Process Automations
- Prebuilt Templates

"Celigo is the easiest integration I've ever accomplished and probably the least expensive, as well. It meant that we didn't have to spend tens of thousands of dollars in order to get this integrated. Now that it is live, I literally need one hour of Celigo's time to check it, and then I'm done. So that makes it very nice, and gives me a lot more options as a business."

Jenna Pennamen
Director of Operations, Gabriel Cosmetics

Customize and Expand

Optimize your business processes

As your business grows, you'll need to add and refine business processes. Celigo's integrator. io iPaaS allows you to easily integrate new software to your existing core applications while providing the flexibility to meet business requirements across departments.

Guided User Interface
Step-by-step wizard with visual field mapping, drop-down menus, and other tools for no-coding integration

Prebuilt Integrations
Save time with over 200 prebuilt connectors and integration templates to popular apps

Complex Orchestrations
Support complex processes by integrating multiple apps and data sources as part of a single integration flow

Advanced Developer Tools
Advanced tools for creating and sharing stacks, generating tokens for direct API calls, building wrappers, and more

Actionable Dashboard
Allows you to monitor and manage integrations, access error details, re-run integrations, and receive alert notifications

Universal Adaptors
Connect with any application or data source using adaptors for REST/JSON, XML, FTP, AS2, EDI, SQL, web hooks, on-prem and more

"I found it to be very user friendly and any tweaks or changes that I've had to make have been very easy and the errors are very clear. When you run into an issue its very easy to tell what the problem was."

Craig Matusinski
Ecommerce Director - Kevin's Worldwide
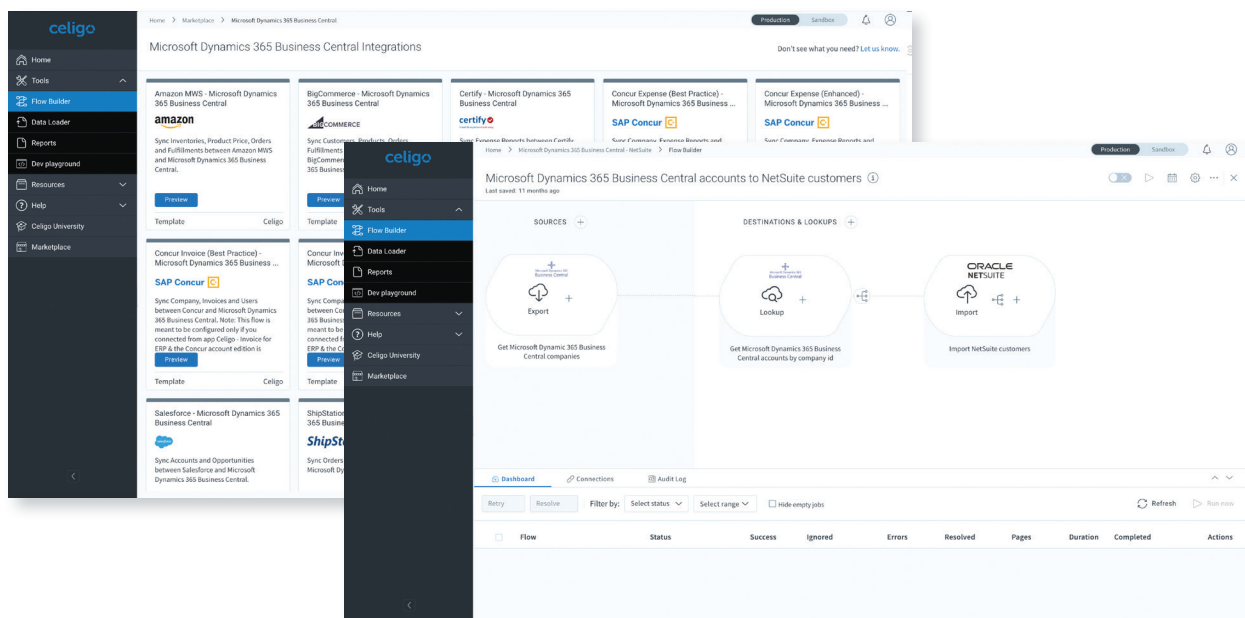

Why **Microsoft Dynamics 365** partner with Celigo

Prebuilt Integration Templates
Reduce implementation costs and time to value with prebuilt integrations to popular apps. Or build your own!

"Celigo was instrumental in helping us fully automate our Quote to Cash process. Automating our transactions from Salesforce prevented us from having to hire an additional five full-time employees. Reducing the need for paper processing has even allowed us to seamlessly transition to a work-from-home policy."

Dave Witty
Director of Financial Systems

"The automation of our staffing processes took away manual work and dramatically changed our labor models. Not only did we save a ton of effort, but we got data integrity, and we no longer have all the errors which affect people's payroll and pay rates."
