Simple and Sophisticated NetSuite Document Storage That Won't Increase Costs

extenddocs

ExtendDocs is a direct integration app for NetSuite that connects to OneDrive and SharePoint to share and store an unlimited number of documents within NetSuite records without using File Cabinet space. Files can be connected to NetSuite using drag and drop or a direct upload to OneDrive, with file sizes ranging up to 250GB, and no restrictions on file type.

With easy access, real-time collaboration, and compliance with enterprise-grade security and data retention policies, OneDrive and SharePoint lay ideal groundwork for document management. Combine this best of breed document management with automated document storage and security in NetSuite through ExtendDocs.

Automatically Create Folders
Each new NetSuite record can trigger the automatic creation of a new set of associated SharePoint or OneDrive folders arranged in a hierarchy or flat folder structure.

Find the Right File
Easy access search bar lets you search SharePoint and OneDrive files without ever leaving NetSuite.
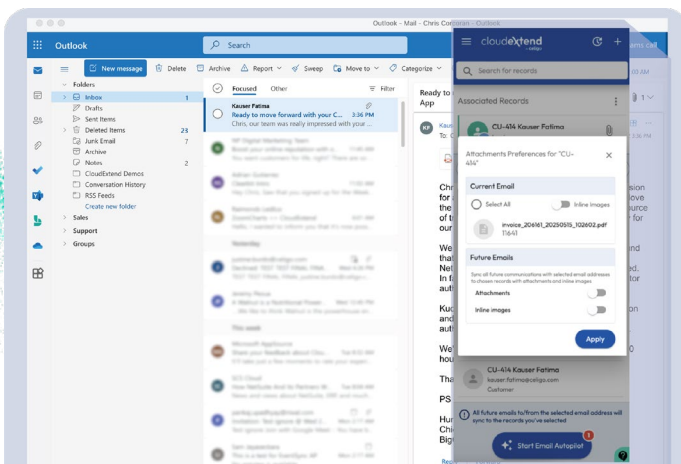

Combine with ExtendSync
Leverage ExtendDocs with your ExtendSync app to save on storage space by adding email attachments to OneDrive and SharePoint instead of NetSuite File Cabinet.
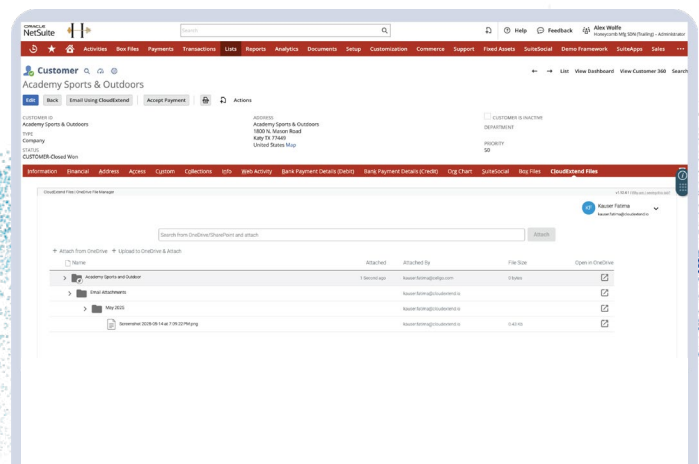

Better Insights for Better Decision-Making
Centralized access to related documents means you have access to the right information at the right time to make the best business decisions possible.

What ExtendDocs Does for You

Eliminates Information Silos
ExtendDoc extends your NetSuite document storage to give coworkers a holistic view of customer activities and related documents associated to each NetSuite record.

Reduce Costs, Not Storage
ExtendDocs connects to OneDrive and SharePoint to share and store an unlimited number of documents for each NetSuite record without using valuable File Cabinet space.

Increase NetSuite Adoption
By reducing the effort to get important information saved in NetSuite, all users will benefit from using NetSuite as a single source of truth.

Stay Secure
ExtendDocs is part of NetSuite's Built for NetSuite (BFN) program. Users log in using native 3-step authorization with full support for two-factor authentication and Single Sign On and all NetSuite roles and permissions are respected.
