

# Everything You Need from NetSuite in Your Inbox

extendsync

ExtendSync for NetSuite offers you an intuitive solution for adding emails, calendar events, and file attachments to NetSuite directly from Outlook or Gmail. Eliminate the need to copy and paste emails and give your team instant organizational visibility into your important communications.

## Better Visibility and Decision-Making

Share important emails, calendar events, and file attachments directly from your mailbox to NetSuite records for a 360-degree view of activity across all internal teams in NetSuite that fosters better business decision-making.

## Stay on Top of Schedules with Calendar Autopilot

Instantly sync calendar events bi-directionally between NetSuite and Outlook or Google calendars. Calendar events are easily attached to NetSuite records for accurate tracking.

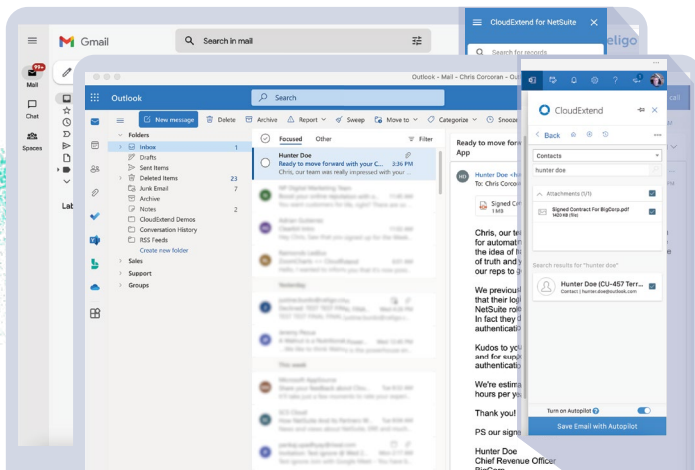

## Innovative Automation with Autopilot

Reduce manual effort by putting emails on Autopilot. All back/forth replies associated with a particular contact or in a thread will be attached to the relevant NetSuite record(s) with no manual effort.

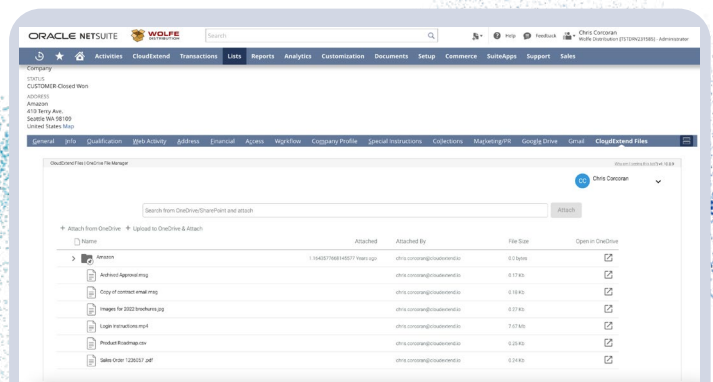

## Save on Storage

Leverage best-of-breed storage systems such as OneDrive for Business, SharePoint, or Google Drive. Associate files and folders with NetSuite records and reduce your storage fees.

Autopilot for Outlook & Gmail

Save on storage with OneDrive, Sharepoint, or Google Drive

# What ExtendSync Does for You

## Make Your CRM Easier to Use

ExtendSync extends your inbox into NetSuite and gives coworkers a holistic view of critical customer activities such as emails and calendar events, maintaining NetSuite as a single source of truth.

## Less Manual Work, Easier Automation

View, create, or edit NetSuite records directly within Outlook or Gmail. Eliminate copying and pasting emails and instead attach them as native NetSuite messages with a single click.

## Keep Your NetSuite Emails Out of Spam

ExtendSync's proprietary "Send from Outlook" feature lets you compose in NetSuite, but sends the email from Outlook so it lands in your sent items—and stays out of recipient spam filters. Automatically track any replies with Autopilot for added benefit.

## Stay Secure (and Keep IT Happy!)

ExtendSync is part of NetSuite's Built for NetSuite (BFN) program. Users log in using native 3-step authorization with full support for two-factor authentication and Single Sign On and all NetSuite roles and permissions are respected.
