

# Improve Business Insights with Data Ingestion for Cloud Data Warehouses

**Accurate, up-to-date, and complete data from any desired data source can be quickly extracted and loaded to your cloud data warehouse without requiring IT resources.**

## One platform to power the digital enterprise

Celigo enables you to solve both application and data integration on one platform. Empower your teams with the data they need to create insights from any cloud data warehouse.

## Leverage newly created insights

Unlike traditional ETL (extract, load, transform) tools, Celigo enables reverse ETL (extract, transform, load) to bring new insights back into your operational applications where business teams can immediately leverage them.

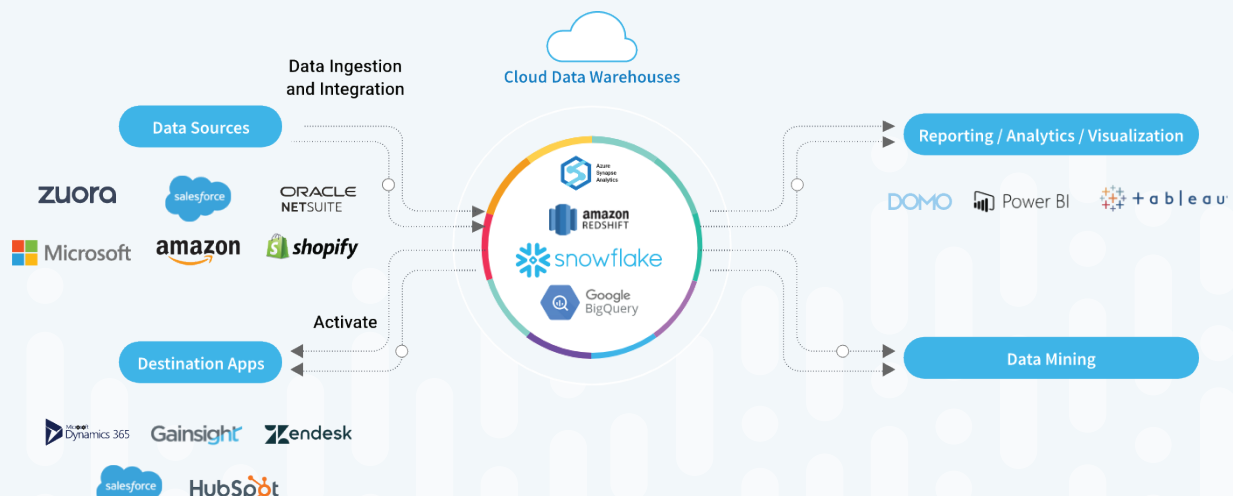

## Improve insights with access to real-time data

Source data from multiple operational applications into your warehouse. Export that data into BI tools or into operational apps to leverage real-time data visualization.

## From start to production in minutes

New source applications can be added to the extract-and-load process in less than 5 minutes. Out-of-the-box configurations for popular applications further reduce implementation times.

# One platform serving your data and application integration needs

## ✓ Embedded business logic

Benefit from the learnings of thousands of customers by using prebuilt flows, settings, and configurations that automate common use cases.

## ✓ Fully managed with automatic updates

Managed by Celigo or our partners, so support for new use cases or updates to APIs are regularly pushed without any downtime.

## ✓ Fastest time to business value

Designed for line-of-business users to automate order to fulfillment business processes 100% out of the box without waiting on expensive technical resources.

## ✓ Future-proof platform extensibility

Built on the Celigo iPaaS, benefit from enterprise grade data security, AI-powered error management and the ability to support custom use cases.

## Built on the **Leading iPaaS Platform** with infinite scalability

Secure, Low-Code, Self-Service

The Celigo integration platform (iPaaS) enables IT and non-IT teams alike to quickly automate business processes end-to-end using proven best practices.
