iPaaS Software (continued)

iPaaS Software Definition

Integration platform as a service (iPaaS) solutions provide a centralized console to manage, govern, and integrate cloud-based applications. These tools work by connecting cloud applications and services and controlling integration flows. iPaaS software tools can speed up product development by integrating existing tools, and increase data volume by utilizing external sources. Companies use these tools to scale performance needs, add product functionality, and structure application integrations. Features or data can be added or removed quickly, reducing failover, downtime, and development time. iPaaS software provides the infrastructure for creating connections and deploying software applications within the cloud.

There is some relationship between iPaaS and [enterprise service bus \(ESB\) software](#), but iPaaS platforms are typically used for customer-facing applications and is deployed on cloud, while ESB is used for internal data transfers and is deployed on premises.

iPaaS solutions often feature user-friendly, low-code or no-code environments for building these integrations, though some iPaaS vendors also offer advanced developer tools for more complex integrations.

To qualify for inclusion in the iPaaS category, a product must:

- ▶ Build, deploy, and manage integrations within the cloud
- ▶ Allow users to govern and manage integration flows
- ▶ Connect various cloud-to-cloud systems and solutions
- ▶ Consolidate cloud solutions into a single platform

iPaaS Grid® Scoring Description

Products shown on the Grid® for iPaaS have received a minimum of 10 reviews/ratings in data gathered by November 04, 2025. Products are ranked by customer satisfaction (based on user reviews) and market presence (based on market share, seller size, and social impact) and placed into four categories on the Grid®:

- ▶ Products in the Leader quadrant are rated highly by G2 users and have substantial Market Presence scores. Leaders include: [Celigo](#), [Zapier](#), [Workato](#), [Boomi](#), [HubSpot Data Hub](#), [DBSync Cloud Workflow](#), [Albato](#), [n8n](#), [Boost.space](#), [MuleSoft Anypoint Platform](#), [ServiceNow Integration Hub](#), [SnapLogic Intelligent Integration Platform \(IIP\)](#), [Relay.app](#), [Integrateley](#), [Activepieces](#), [Patchworks](#), [Superblocks](#), [SEEBURGER Business Integration Suite](#), [Appy Pie](#), [Frends](#), [IFTTT](#), and [Prismatic](#)
- ▶ High Performing products have high customer Satisfaction scores and low Market Presence compared to the rest of the category. High Performers include: [Files.com](#), [Tines](#), [Zluri](#), [Flexspring](#), [Whalesync](#), [BURQ iPaaS](#), [Flowgear](#), [DataBlend](#), [Pandium](#), [ElectroNeek: RPA and AI Platform](#), [klamp](#), [Konnectify](#), [Venn Technology](#), [Hightouch](#), [Recursyv](#), [hotglue](#), [Quickwork](#), [ApiX-Drive](#), [Tavio](#), [Census](#), [Robocorp](#), [Exalate](#), [Alloy Automation](#), [Skyvia](#), [MindCloud](#), [Martini](#), [RudderStack](#), [Cyclr](#), [Nexla](#), [Syncari](#), [IConduct](#), and [StarfishETL](#)
- ▶ Contender products have relatively low customer Satisfaction scores and high Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Contenders include: [IBM App Connect](#), [IBM webMethods Integration](#), [Azure Logic Apps](#), [Jitterbit](#), [TIBCO Integration \(featuring Business Works and Flogo\)](#), [UiPath Agentic Automation](#), [Informatica Cloud Data Integration](#), [Oracle Integration Cloud](#), [IBM webMethods API Management](#), [IBM DataPower Gateway](#), [Digibee](#), [Make](#), [SAP Integration Suite](#), [Cleo Integration Cloud](#), [Control-M](#), [IBM Cloud Pak for Integration](#), [Red Hat Fuse](#), [Tray.ai](#), and [Informatica API and Application Integration](#)
- ▶ Niche products have relatively low Satisfaction scores and low Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Niche products include: [APPSeCONNECT](#), [Talend Cloud Data Integration](#), [Unito](#), [Alteryx Designer Cloud](#), [CiraSync](#), [Integrate.io](#), [Dataddo](#), [iPaaS with ITPA](#), [Keboola](#), [Central](#), [eZintegrations](#), [enosix](#), [Cinchy](#), [Omatic Software](#), [ibi Omni-Gen](#), [Peregrine Connect](#), [Adeptia Connect](#), [Polytomic](#), [Apiway](#), [SyncApps](#), [Warewolf](#), [Alumio](#), [Momentum](#), [Linx](#), [Roghnu](#), and [KonnectzIT](#)

Grid® Scores for iPaaS Software

The table below shows the Satisfaction and Market Presence scores that determine product placement on the Grid®. To learn more about each of the products, please see the profile section.

Leaders

	# of Reviews	Satisfaction	Market Presence	G2 Score
Celigo	559	100	92	96
Zapier	844	94	96	95

* Products are ordered by G2 Score. Satisfaction score is used as a tiebreaker if two products have the same G2 Score.

Grid® Methodology

Grid® Rating Methodology

The Grid® represents the democratic voice of real software users, rather than the subjective opinion of one analyst. G2 rates products from the iPaaS category algorithmically based on data sourced from product reviews shared by G2 users and data sourced from third parties.

Technology buyers can use the Grid® to help them quickly select the best products for their businesses and to find peers with similar experiences. For sellers, media, investors, and analysts, the Grid® provides benchmarks for product comparison and market trend analysis..

Grid® Scoring Methodology

The Grid® Report for iPaaS | Winter 2026 is based on reviews collected through November 04, 2025. We apply unique algorithms to this data to calculate Satisfaction (v4.0) and Market Presence (v7.0) scores for the Winter 2026 report quarter. To view the iPaaS Grid® with the most recent data, please visit the [iPaaS](#) page. For more details on Grid® Scoring, please view the [G2 Scoring Methodology here](#).

Grid® Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available [categorization methodology](#). All products appearing on the Grid® have passed through G2's categorization methodology and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®. A [list of standard definitions](#) is available to G2 users to eliminate confusion and ease the buying process.

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and third-party data collected by G2 up through November 04, 2025. The ratings may change as the products are further developed, the sellers grow, and as additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received. By improving their products and support and/or by having more satisfied customer voices heard, Contenders may become Leaders and Niche sellers may become High Performers.

Trust

Keeping our ratings unbiased is our top priority. G2 follows defined community guidelines to ensure privacy, and authenticity for users and reviews. For more details, please view the [G2 Community Guidelines here](#).

(Grid® Methodology continues on next page)

** Net Promoter, Net Promoter System, Net Promoter Score, NPS and the NPS-related emoticons are registered trademarks of Bain & Company, Inc., Fred Reichheld and Satmetrix Systems, Inc.

Grid® Methodology (continued)

Grid® Inclusion Criteria

All products in a G2 category that have at least 10 reviews from real users of the product are included on the Grid®. Inviting other users, such as colleagues and peers, to join G2 and share authentic product reviews will accelerate this process.

If a product is not yet listed on G2 and it fits the market definition above, then users are encouraged to [suggest its addition](#) to our [iPaaS category](#).

Product Profiles

Product profiles and detailed charts are included for products with 10 or more reviews.

Celigo

4.7 ★★★★★ (693)

Celigo has been named a Leader based on receiving a high customer Satisfaction score and having a large Market Presence. Celigo received the highest Satisfaction score among products in iPaaS. 97% of users rated it 4 or 5 stars, 94% of users believe it is headed in the right direction, and users said they would be likely to recommend Celigo at a rate of 93%. Celigo is also in the API Management, API Marketplace, and Electronic Data Interchange (EDI) categories.
