Amazon – SAP Business ByDesign

Integration Application

Prebuilt integration to automate order processing, fulfillments, inventory management, and more between Amazon and SAP Business ByDesign

Embedded business logic

Benefit from the learnings of thousands of customers by using prebuilt flows, settings, and configurations that automate common use cases.

Fully managed with automatic updates

Managed by Celigo or our partners, so support for new use cases or updates to APIs are regularly pushed without any downtime.

Fastest time to business value

Designed for line-of-business users to automate order to fulfillment business processes 100% out of the box without waiting on expensive technical resources.

Future-proof platform extensibility

Built on the Celigo iPaaS, benefit from enterprise grade data security, AI-powered error management and the ability to support custom use cases.

Advanced Capabilities

✓ Multi-Channel Order Sync

Synchronize orders from all channels, including social, and phone orders, between Amazon and SAP Business ByDesign to make sure orders are not missed or delayed.

✓ Sales Tax Handling

Use either SAP Business ByDesign or Amazon to calculate sales taxes. If Amazon is used, import tax as a single line in SAP Business ByDesign.

✓ Inventory Support

Update inventory levels from either single or multiple warehouse locations with support for all SAP Business ByDesign Item types.

✓ Merchant and Amazon Order Support

Synchronize Merchant Fulfilled (MFN) and Fulfillment By Amazon (FBA) orders from Amazon to SAP Business ByDesign to ensure both order types are quickly fulfilled.

✓ Cancellations

Sync order cancellations from SAP Business ByDesign to Amazon to keep Customer Service, Finance and customers up-to-date.

✓ Inventory Summary

Summarize inventory levels across multiple inventory locations in SAP Business ByDesign and export the total to Amazon.

Built on the **Leading iPaaS Platform** with infinite scalability

Secure, Low-Code, Self-Service

The Celigo integration platform (iPaaS) enables IT and non-IT teams alike to quickly automate SAP Business ByDesign processes end-to-end using proven best practices.
