

Top Challenges for IT in 2023 and 2024

Why Integration and Automation will be more relevant than ever

Shari Lava
September 2023

Agenda for Today

Business Has Changed

Digital business strategies are underway

Success Measures Must Change

KPIs are evolving to tie IT projects to business outcomes

Automation is Changing

Holistic enterprise automation is a must

AI Will Change Business Again

Capabilities will shift roles needed in businesses

Think back 5 years – How has the role of IT changed since 2018?

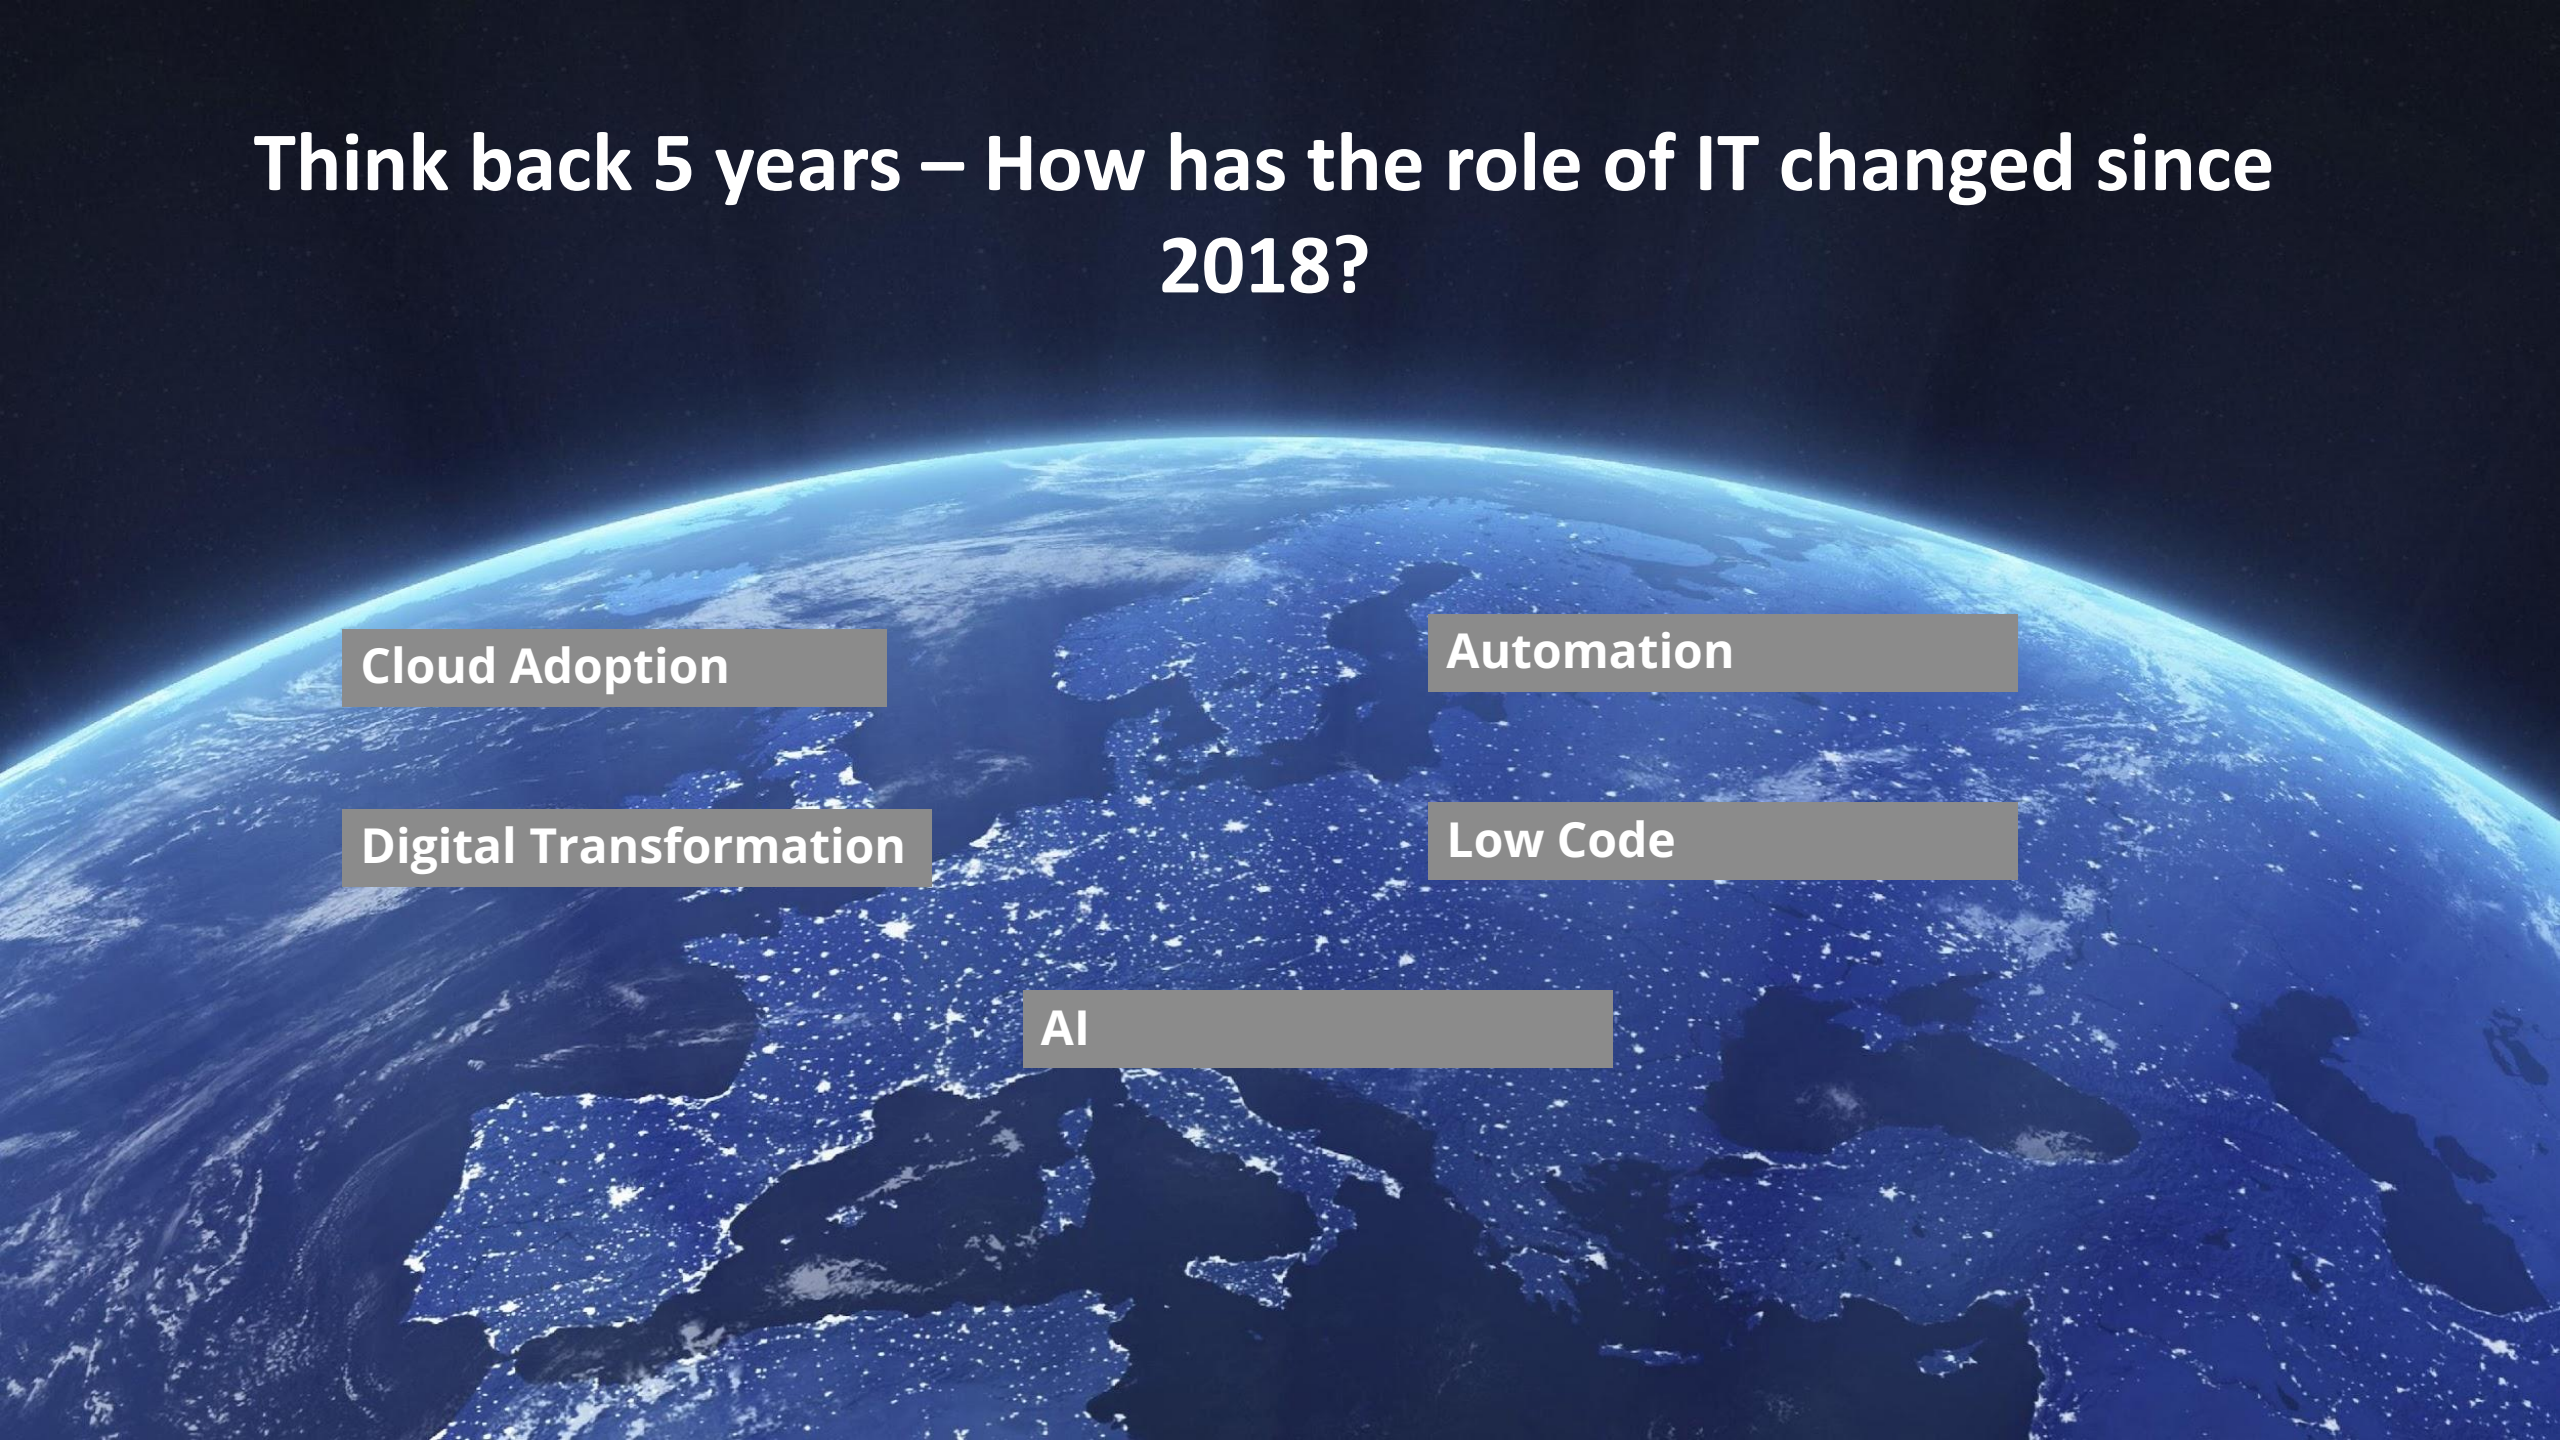

Cloud Adoption

Automation

Digital Transformation

Low Code

AI

Most organizations took big steps to becoming more digital businesses in the last 5 years, becoming more resilient and data-driven

To what extent do you think your organization is a digital business?

- Not at all: we are still figuring out how to transform our business
- Somewhat: we have a digital strategy and are in the process of transforming the business to become more digital
- To a large degree: we have a digital-first strategy, and our organization has deployed digital technologies at scale across the business

The global economy is volatile currently, causing concerns about the continued investment on digital initiatives

Will there Be a Recession in the Coming Year?

How Severe Will that Recession Be?

But IT Budgets are showing some resilience against 'cross-the-board' budget reductions

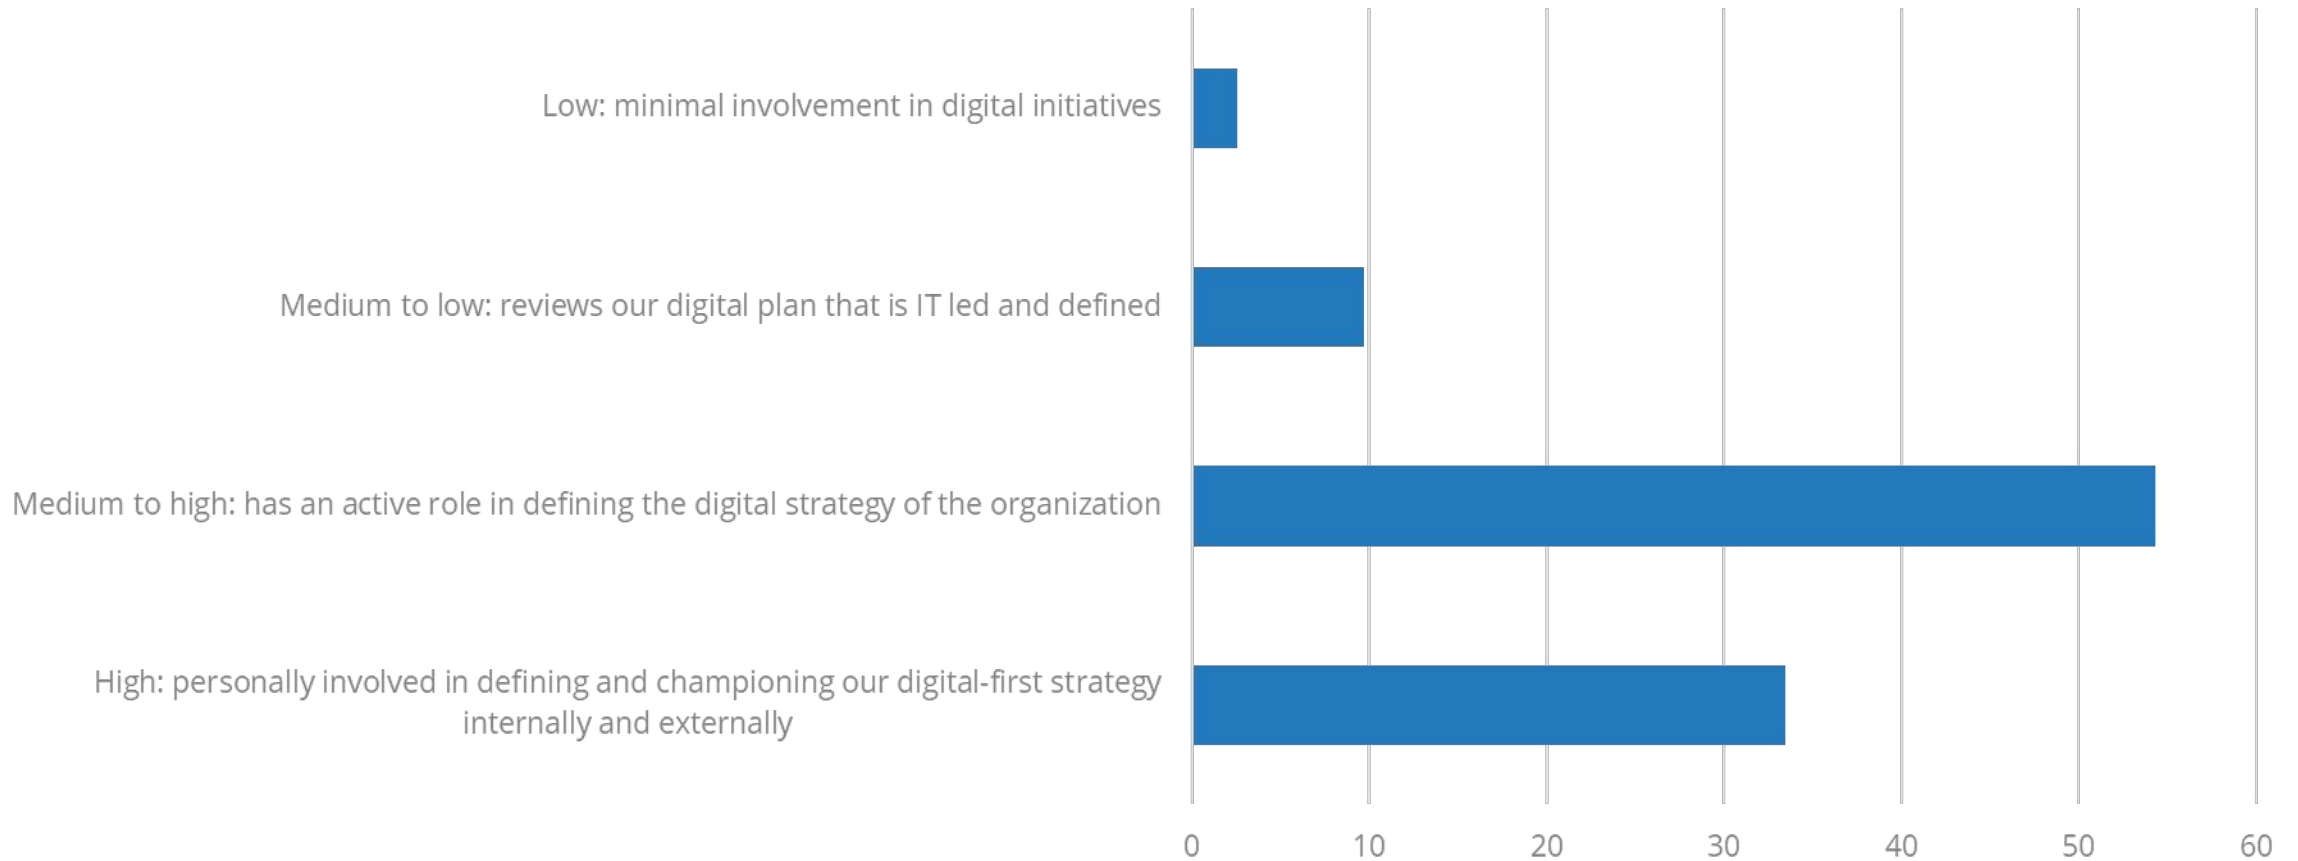

How do you think a recession in 2023 would impact your organization's IT budgets?

- Reduction in overall IT budgets in 2023
- Reduction in specific IT budget items in 2023
- No impact on IT budgets in 2023
- Increase in IT budgets in 2023
- Don't Know

CEOs are Taking Significant and Active Roles in Digital Strategy

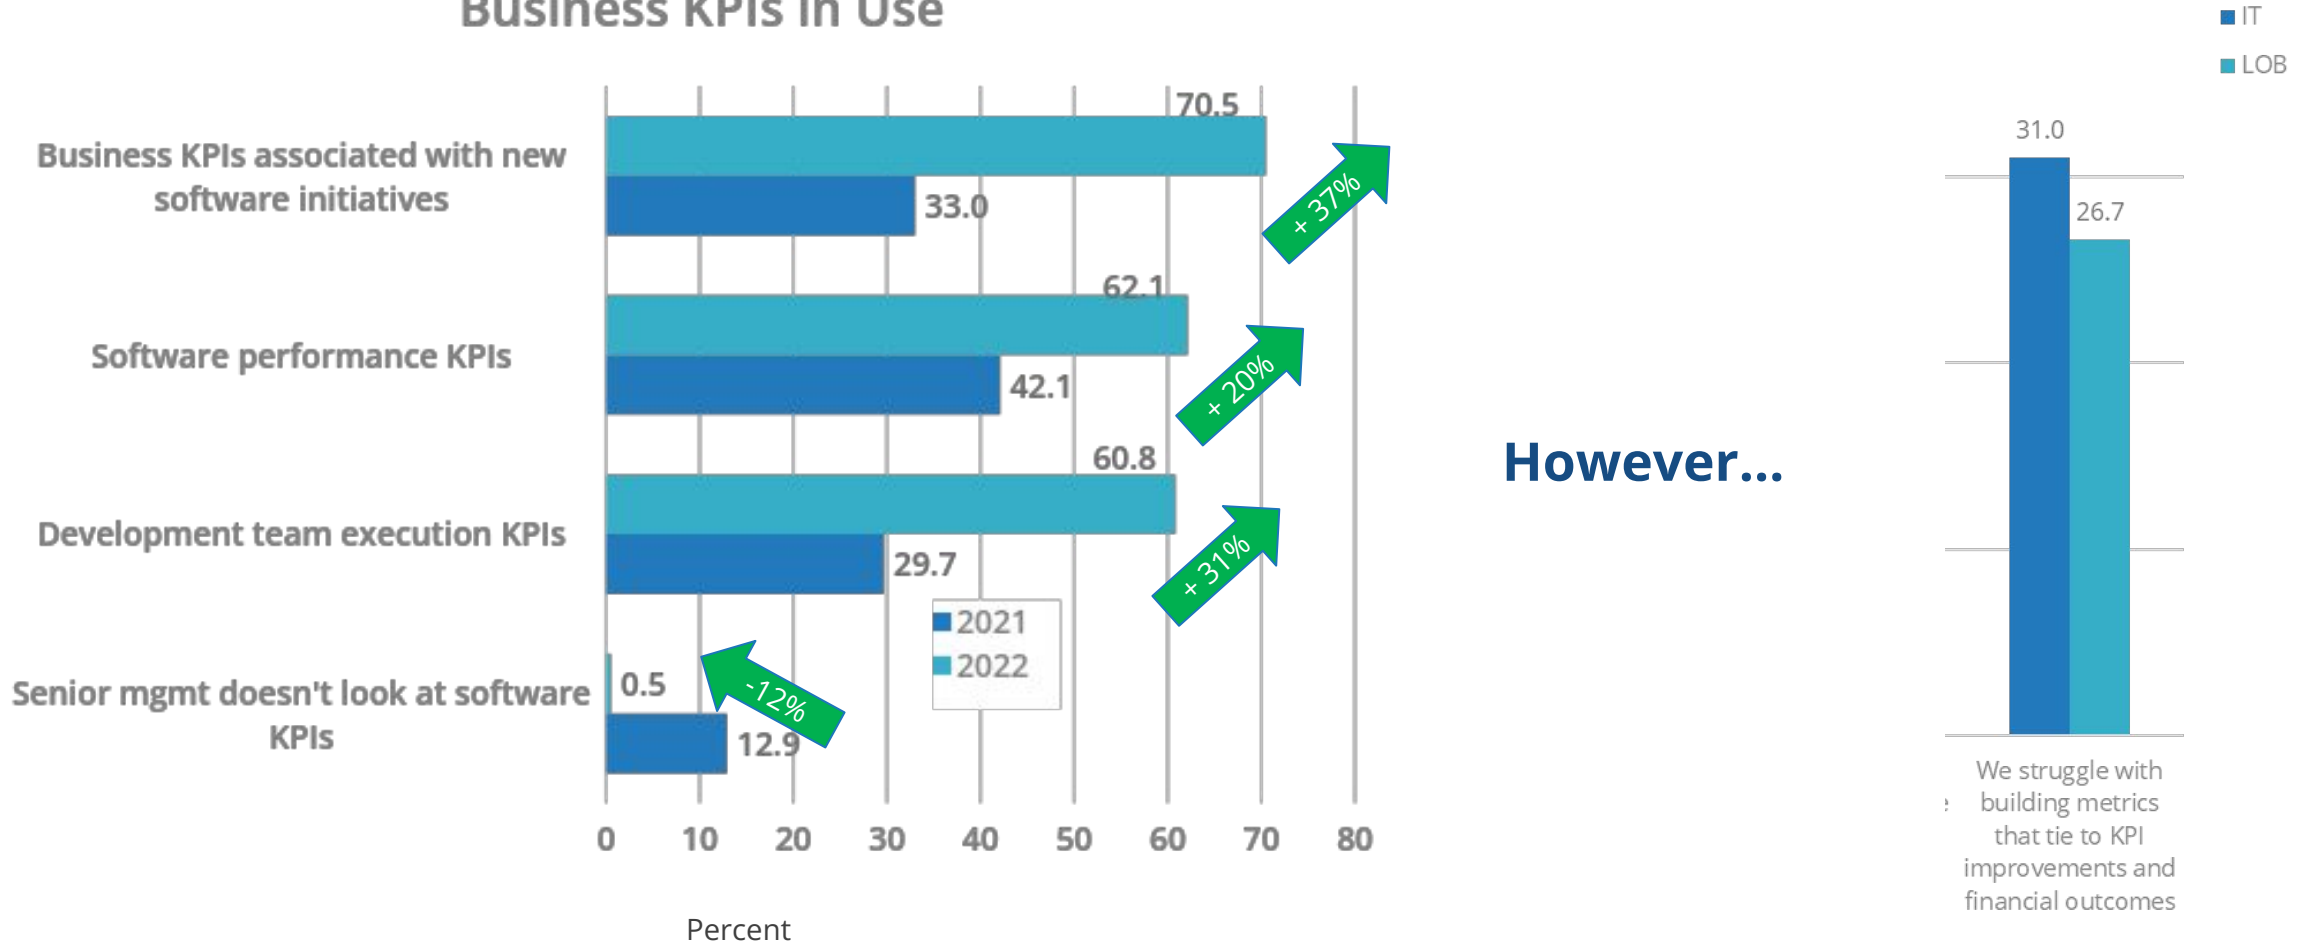

In your organization, what role does the CEO play in driving your digital strategy?

n = 829

Stakeholders across the organization are increasingly using KPIs to measure success of enterprise automation projects including software projects

Business KPIs in Use

However...

We struggle with building metrics that tie to KPI improvements and financial outcomes

Connecting IT output to business benefits and outcomes is needed to keep momentum and executive support strong in digital business transformation

Increases in digital maturity build the appetite for more use of AI and Automation, but to do that the organization needs strong data movement capabilities

Which of the following technologies is your organization investing in to improve enterprise value?

n = 829

Automation in the Past

Brittle

Fragmented

Siloed

A polar bear is standing on a large, fragmented piece of sea ice in a blue ocean. The ice is broken into several large, irregular chunks, with the bear on the largest one in the foreground. The water is a deep blue, and the sky is not visible. The bear is facing right, and its shadow is cast on the ice.

Causes of Islands of Automation

Disconnected
Transactional
Systems

Point to Point
Data Movement

Siloed Project
Teams

Incomplete
Toolset

Integration continues to be adopted because it drives efficiency, but also because it is foundational to achieving the business outcomes from other priorities

Which of the following areas are most immune to budget reduction regardless of the economic environment? Continued investment is a must in 2023 for.....? (Most and next Most)

Feb 2023

Worldwide

Security, Risk, & Compliance	19%	9%
Customer Experience initiatives/projects	10%	10%
Infrastructure & IT Operation optimization initiatives/projects	9%	11%
Workplace Solutions	9%	11%
Data & Analytics initiatives/projects	8%	10%
Back-office Applications	8%	10%
Consulting and systems integration services	9%	8%
Application Development and Deployment platforms	8%	8%
End-user Devices	8%	8%
Integration and Automation initiatives/projects	7%	8%
No area is immune to budget reduction	-	7%

March 2023

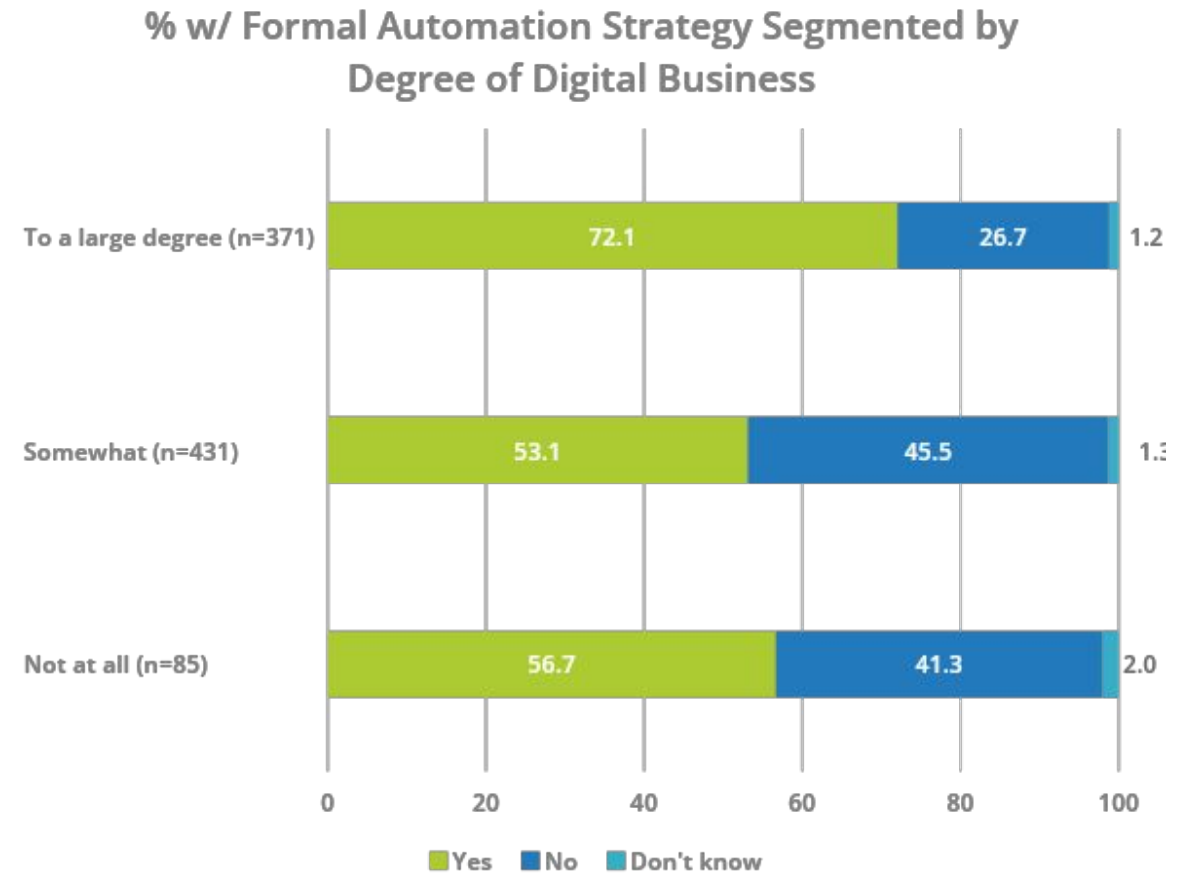

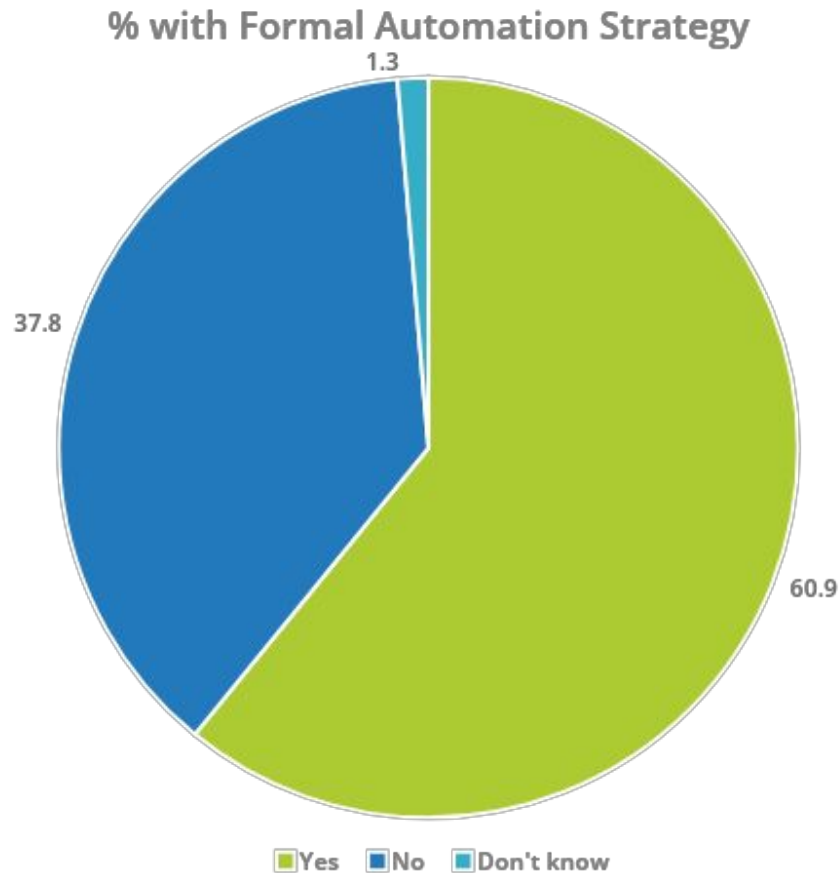

Worldwide

Security, Risk, & Compliance	15%	12%
Infrastructure & IT Operation optimization initiatives/projects	14%	10%
Workplace Solutions	10%	11%
Customer Experience initiatives/projects	9%	7%
Integration and Automation initiatives/projects	9%	8%
Application Development and Deployment platforms	8%	7%
Back-office Applications	8%	11%
Data & Analytics initiatives/projects	7%	11%
Consulting and systems integration services	7%	6%
End-user Devices	7%	9%
No area is immune to budget reduction	7%	

A holistic automation strategy is linked to digital business transformation success

Does your organization have an automation strategy in place?

IT and Business users face different challenges in finding success with automation technologies

What are the top two challenge you encounter with automation technologies?

n = 833

Source: Future Enterprise Resiliency & Spending Survey - Wave 8, IDC, September, 2022

Generative AI is going to super-charge low code integration development for many companies solving some business user challenges

What's your organization's current approach to Generative AI?

- We are not doing anything yet.
- We are doing some initial exploration of potential use cases.
- We are investing in Generative AI technologies in 2023.

In which two business areas do you think generative AI could make the most impact in the next 18 months?

What Generative AI use cases do you anticipate having the most promise for your organization?

Key Takeaways

01

Becoming Digital

It's even more important to become a digital business.

02

Measure Up

Change what you measure

03

Re-think Automation

Integration needs strong capabilities to enable the future
